

Plant Mitochondria: From Genome to Function

Edited by

David A. Day

A. Harvey Millar

and

James Whelan

*School of Biomedical and Chemical Sciences, The University of
Western Australia, Australia*

KLUWER ACADEMIC PUBLISHERS

DORDRECHT / BOSTON / LONDON

Contents

Preface	xv
The Editors	xvii
Color Plates	CP-1
1 Mitochondrial Structure and Function in Plants	1–12
<i>David A. Day</i>	
Summary	1
Abbreviations	1
I. Mitochondrial Structure and Numbers	1
II. Organic Acid Oxidation	2
III. Regulation of Organic Acid Oxidation in Plant Mitochondria	4
IV. Amino Acids and Fatty Acid Metabolism	4
V. Mitochondrial Involvement in Ammonia Assimilation and Amino Acid Synthesis	5
VI. Plant Mitochondrial Electron Transport	6
VII. Non-phosphorylating Bypasses of the Electron Transport Chain in Plants	7
VIII. Plant Mitochondrial ATP Synthesis	8
IX. Regulation of Mitochondrial Respiration in Plants	9
X. Interactions Between Mitochondria and Other Cellular Compartments	10
Acknowledgments	11
References	11
2 Mitochondrial Morphology, Dynamics and Inheritance	13–30
<i>David C. Logan</i>	
Summary	13
I. Introduction	13
II. Mitochondrial Evolution	14
III. Plastid Division	14
IV. Mitochondrial Form and Movement	15
V. Mitochondria Fission and Fusion	17
VI. Mitochondrial Inheritance and Distribution	22
VII. Plant Specific Proteins Playing a Role in Mitochondrial Dynamics	25
VIII. Mitochondrial Dynamics and Whole Cell Physiology	25
IX. Conclusions	26
Acknowledgments	27
References	27
3 Protein Targeting and Import	31–54
<i>James Whelan and Enrico Schleiff</i>	
Summary	31
Abbreviations	32
I. Introduction	32

II.	Travelling Toward Organelles—A Journey Through the Jungle?	32
III.	The Targeting Signal—Stick or Compass?	37
IV.	The Plant Mitochondrial Import Apparatus	41
V.	Conclusions and Perspectives	48
	Acknowledgments	48
	References	48
4	Gene Expression in Higher Plant Mitochondria	55–82
	<i>Dominique Gagliardi and Jose Manuel Gualberto</i>	
	Summary	55
	Abbreviations	56
I.	Introduction	56
II.	Transcription of Plant Mitochondrial Genes	57
III.	Post-Transcriptional Processing of Plant Mitochondrial RNAs	61
IV.	Translation in Plant Mitochondria	72
V.	Modulation of Mitochondrial Gene Expression during Development	73
VI.	Conclusions	74
	References	74
5	Mitochondria–Nucleus Interactions: Evidence for Mitochondrial Retrograde Communication in Plant Cells	83–106
	<i>David M. Rhoads and Greg C. Vanlerberghe</i>	
	Summary	83
	Abbreviations	84
I.	Introduction	84
II.	The Relationship of Mitochondrial and Nuclear Genomes in Plants	84
III.	Retrograde Signaling in Response to Mitochondrial Dysfunction	87
IV.	Potential Retrograde Signaling During Development	90
V.	Retrograde Signaling in Response to Cellular Stress	90
VI.	Evidence for Multiple Retrograde Signaling Pathways in Plants	93
VII.	Systems to Investigate Retrograde Signaling in Plants	93
VIII.	Potential Components of Retrograde Signaling Pathways	94
IX.	Concluding Remarks	100
	Acknowledgments	100
	References	100
6	Plant Mitochondrial Genome Evolution and Gene Transfer to the Nucleus	107–120
	<i>Keith L. Adams and Daniel O. Daley</i>	
	Summary	107
	Abbreviations	108
I.	Rapid Evolution of Plant Mitochondrial Genome Size and Structure	108
II.	Gene Transfer from the Mitochondrion to the Nucleus	110
III.	Protein Targeting Following Gene Relocation	113
	Acknowledgments	117
	References	117

7	Mitochondrial Mutations in Plants	121–142
	<i>Kathleen J. Newton, Susan Gabay-Laughnan and Rosine De Paepe</i>	
	Summary	122
	Abbreviations	122
	I. Introduction	122
	II. Plant Mitochondrial Genomes	124
	III. Chimeric Genes associated with Cytoplasmic Male Sterility (CMS)	126
	IV. Deletion Mutations: Cytoplasmic Reversions of CMS to Fertility	128
	V. Deletion Mutations: Abnormal Growth Mutants	129
	VI. mtDNA Mutations and Mitochondrial Genome Evolution	133
	VII. Nuclear–Cytoplasmic Interactions	133
	VIII. Conclusions	136
	Acknowledgments	136
	References	136
8	Proteome Analyses for Characterization of Plant Mitochondria	143–162
	<i>Hans-Peter Braun and A. Harvey Millar</i>	
	Summary	144
	Abbreviations	144
	I. Introduction	144
	II. Analyses of Plant Mitochondrial Proteins by 2D Gel Electrophoresis (1980–2001)	145
	III. Analyses of <i>Arabidopsis</i> Mitochondria by Proteomics since 2001	149
	IV. Proteome Analysis of Mitochondria from Other Plants	157
	V. Future Outlook	158
	References	158
9	Alternative Mitochondrial Electron Transport Proteins in Higher Plants	163–230
	<i>Patrick M. Finnegan, Kathleen L. Soole and Ann L. Umbach</i>	
	Summary	164
	Abbreviations	165
	I. Introduction	165
	II. Alternative NAD(P)H Dehydrogenases	167
	III. Alternative Oxidase	177
	IV. Conclusions and Perspectives	216
	Acknowledgments	217
	References	217
10	Regulation of Electron Transport in the Respiratory Chain of Plant Mitochondria	231–246
	<i>Francis E. Sluse and Wiesława Jarmuszkiewicz</i>	
	Summary	231
	Abbreviations	232
	I. Introduction	232
	II. The “Phosphorylating” Electron Flow Pathway	234
	III. The “Non-Phosphorylating” Electron Flow Pathways	236

IV.	Proton Electrochemical Gradient Consumption	238
V.	Functional Connection Between Alternative Oxidase and Uncoupling Protein	241
VI.	Conclusion and Perspectives	243
	Acknowledgments	244
	References	244
11	Plant Mitochondrial Carriers	247–276
	<i>Ferdinando Palmieri, Nathalie Picault, Luigi Palmieri and Michael Hodges</i>	
	Summary	248
	Abbreviations	248
I.	Introduction	248
II.	General Features of the Members of the Mitochondrial Carrier Family	249
III.	The Mitochondrial Carriers of Non-Plant Systems	250
IV.	Plant Mitochondrial Carriers	251
V.	Strategies to Identify the Function of New Plant Mitochondrial Carriers	267
VI.	Conclusions	269
	Acknowledgments	269
	References	269
12	The Uniqueness of Tetrahydrofolate Synthesis and One-Carbon Metabolism in Plants	277–292
	<i>Stéphane Ravel, Roland Douce and Fabrice Rébeillé</i>	
	Summary	277
	Abbreviations	278
I.	Introduction	278
II.	Genes and Enzymes Involved in Tetrahydrofolate Biosynthesis	279
III.	The Origin and Interconversion of One-Carbon Units	284
IV.	Concluding Remarks	288
	References	289
13	Photorespiration: Photosynthesis in the Mitochondria	293–306
	<i>David J. Oliver and Per Gardeström</i>	
	Summary	293
	Abbreviations	294
I.	Introduction	294
II.	The Oxygenase Reaction of Rubisco and the C ₂ Cycle	294
III.	The Photorespiratory C ₂ Cycle	295
IV.	Control of Photorespiration	301
V.	Cellular Consequences of Photorespiration	302
	References	304
14	Roles for Reactive Oxygen Species and Antioxidants in Plant Mitochondria	307–320
	<i>Lee J. Sweetlove and Christine H. Foyer</i>	
	Summary	307
	Abbreviations	308

I.	Introduction	308
II.	The Production of Reactive Oxygen Species by Plant Mitochondria	309
III.	Oxidants and Antioxidants	311
IV.	Mitochondrial Mechanisms that Attenuate Oxidative Stress	311
V.	The Consequences of Mitochondrial Oxidative Stress	315
VI.	Conclusions	317
	References	317
