## ***Part I: Biosynthetic Pathways and the Distribution of Carotenoids in Photosynthetic Organisms***

---

<b>1</b>	<b>Carotenoids in Photosynthesis: An Historical Perspective</b>	<b>1–19</b>
	<i>Govindjee</i>	
	Summary	1
	I. Introduction	2
	II. Excitation Energy Transfer: Sensitized Fluorescence and Photosynthesis	5
	III. The 515 nm Effect: Carotenoids as a Microvoltmeter	10
	IV. Photoprotection	10
	V. Conclusions	14
	Acknowledgments	15
	References	15
<b>2</b>	<b>Carotenoid Synthesis and Function in Plants: Insights from Mutant Studies in <i>Arabidopsis thaliana</i></b>	<b>21–37</b>
	<i>Dean DellaPenna</i>	
	Summary	21
	I. Scope of This Chapter	22
	II. Introduction: An Overview of Carotenoid Synthesis	22
	III. Rationale for Identifying and Studying Carotenoid Biosynthetic Mutants in Higher Plants	26
	IV. <i>Arabidopsis</i> as a Model System for Studying Carotenoid Synthesis and Functions in Plants	27
	V. Conclusions and Prospectus	34
	Acknowledgments	34
	References	35
<b>3</b>	<b>Carotenoids and Carotenogenesis in Anoxygenic Photosynthetic Bacteria</b>	<b>39–69</b>
	<i>Shinichi Takaichi</i>	
	Summary	40
	I. Introduction	40
	II. Carotenogenesis	41
	III. Distribution of Carotenoids in Photosynthetic Bacteria	57
	Acknowledgments	65
	References	65

## ***Part II: Structure of Carotenoid-Chlorophyll Protein Complexes***

---

<b>4</b>	<b>The Structure and Function of the LH2 Complex from <i>Rhodospseudomonas acidophila</i> Strain 10050, with Special Reference to the Bound Carotenoid</b>	<b>71–80</b>
	<i>Richard J. Cogdell, Paul K. Fyfe, Tina D. Howard, Niall Fraser, Neil W. Isaacs, Andy A. Freer, Karen McKluskey and Stephen M. Prince</i>	
	Summary	71
	I. Introduction	71
	II. The LH2 Complex from <i>Rhodospseudomonas acidophila</i>	72
	III. Energy Transfer Between Carotenoids and BChl in LH2	77
	Acknowledgments	79
	References	79
<b>5</b>	<b>Carotenoids as Components of the Light-harvesting Proteins of Eukaryotic Algae</b>	<b>81–98</b>
	<i>Roger G. Hiller</i>	
	Summary	81
	I. Introduction	82
	II. Water Soluble Proteins	83
	III. Intrinsic Thylakoid Proteins	87
	IV. Evolution	95
	V. Future Directions	95
	Acknowledgements	96
	References	96
<b>6</b>	<b>The Structure of Reaction Centers from Purple Bacteria</b>	<b>99–122</b>
	<i>Günter Fritzsche and Andreas Kuglstatter</i>	
	Summary	99
	I. Introduction	100
	II. Preparation of Three-Dimensional Crystals	101
	III. Survey of Structure and Function	102
	IV. Subunits L, M, and H	104
	V. Cytochrome Subunit	106
	VI. Bacteriochlorophylls, Bacteriopheophytins, and Carotenoid	107
	VII. Quinones and Non-Heme Iron	113
	VIII. Clusters of Firmly Bound Water Molecules and Proton Transfer	116
	IX. Comparison with Photosystem II	118
	X. Outlook	118
	Acknowledgments	118
	References	118
<b>7</b>	<b>Carotenoids and the Assembly of Light-Harvesting Complexes</b>	<b>123–135</b>
	<i>Harald Paulsen</i>	
	Summary	123

I. Introduction: Possible Structural Role of Carotenoids in the Assembly of Light-Harvesting Complexes	124
II. Light-Harvesting Complexes of Purple Bacteria	125
III. Light-Harvesting Chlorophyll- <i>a/b</i> Complexes	126
IV. Photoprotection During Assembly	132
Acknowledgments	132
References	132

### ***Part III: Electronic Structure, Stereochemistry, Spectroscopy, Dynamics and Radicals***

---

#### **8 The Electronic States of Carotenoids 137–157** *Ronald L. Christensen*

Summary	137
I. Introduction: Low Lying Excited Singlet and Triplet States in Carotenoids	138
II. Low-Energy, Excited Singlet States in Polyenes	139
III. Low-Energy, Excited Singlet States in Carotenoids	143
IV. Triplet States in Polyenes and Carotenoids: Spectroscopic Observations and Theory	152
V. Conclusions and Unresolved Issues	153
Acknowledgments	156
References	156

#### **9 *Cis-Trans* Carotenoids in Photosynthesis: Configurations, Excited-State Properties and Physiological Functions 161–188** *Yasushi Koyama and Ritsuko Fujii*

Summary	162
I. Introduction	162
II. Dependence of the Ground-State and the Excited-State Properties on the Configuration of the Carotenoid	163
III. Light-Harvesting Function of All- <i>Trans</i> Carotenoids in the LHC	174
IV. Photo-Protective Function of 15- <i>Cis</i> Carotenoids in the RC	180
Acknowledgments	185
References	186

#### **10 The Electronic Structure, Stereochemistry and Resonance Raman Spectroscopy of Carotenoids 189–201** *Bruno Robert*

Summary	189
I. Introduction	190
II. Principles of Raman Spectroscopy	190
III. Resonance Raman Spectroscopy and Carotenoid Stereochemistry	191
IV. Resonance Raman Spectroscopy of Excited States of Carotenoids	195
V. Resonance Raman of Carotenoid Molecules In Vivo: Light-Harvesting Proteins	196
VI. Resonance Raman of Carotenoid Molecules In Vivo: Reaction Centers	198

VII. Perspectives	199
Acknowledgments	199
References	199
<b>11 Electron Magnetic Resonance of Carotenoids</b>	<b>203–222</b>
<i>Alexander Angerhofer</i>	
Summary	203
I. Introduction	204
II. Photosynthetic Systems	204
III. Model Systems	212
IV. Carotenoid Radicals	214
References	215
<b>12 Carotenoid Radicals and the Interaction of Carotenoids with Active Oxygen Species</b>	<b>223–234</b>
<i>Ruth Edge and T. George Truscott</i>	
Summary	223
I. Introduction	224
II. Electron Transfer Between Carotenoids and Carotenoid Radicals	225
III. Interactions Involving Radicals of Carotenoids and Vitamins C and E	226
IV. Interactions of Carotenoids with Free Radicals	228
V. Reactions between Carotenoids and Singlet Oxygen	231
Acknowledgments	232
References	232
<b>13 Incorporation of Carotenoids into Reaction Center and Light-Harvesting Pigment-protein Complexes</b>	<b>235–244</b>
<i>Harry A. Frank</i>	
Summary	235
I. Introduction	236
II. Reaction Centers	237
III. Light-Harvesting Complexes	240
Acknowledgments	242
References	242

## ***Part IV: Ecophysiology and the Xanthophyll Cycle***

---

<b>14 Ecophysiology of the Xanthophyll Cycle</b>	<b>245–269</b>
<i>Barbara Demmig-Adams, William W. Adams III, Volker Ebbert, and Barry A. Logan</i>	
Summary	245
I. Introduction	246
II. Environmental Modulation of the Xanthophyll Cycle	247
III. Associations Between (Z+A)-Dependent Dissipation, Photosynthesis, and Foliar Antioxidant Levels	263

Acknowledgments	266
References	266

**15 Regulation of the Structure and Function of the Light-Harvesting Complexes of Photosystem II by the Xanthophyll Cycle** **271–291**

*Peter Horton, Alexander V. Ruban and Andrew J. Young*

Summary	272
I. Introduction	272
II. General Model for Non-Photochemical Quenching	274
III. Unanswered Questions Concerning the Roles of the Xanthophyll Cycle in nonphotochemical Quenching	275
IV. Mechanisms of the Xanthophyll Cycle in Controlling qE	280
IV. Conclusions	287
Acknowledgments	288
References	288

**16 Biochemistry and Molecular Biology of the Xanthophyll Cycle** **293–303**

*Harry Y. Yamamoto, Robert C. Bugos and A. David Hieber*

Summary	293
I. Introduction	294
II. Biochemistry	294
III. Molecular Biology	297
Acknowledgments	300
References	300

**17 Relationships Between Antioxidant Metabolism and Carotenoids in the Regulation of Photosynthesis** **305–325**

*Christine H. Foyer and Jeremy Harbinson*

Summary	305
I. Introduction	306
II. Active Oxygen Species and Photosynthesis	317
Acknowledgment	321
References	321

**Part V: Model Systems**

---

**18 Novel and Biomimetic Functions of Carotenoids in Artificial Photosynthesis** **327–339**

*Thomas A. Moore, Ana L. Moore and Devens Gust*

Summary	327
I. Introduction	328
II. Carotenoid Photophysics	328
IV. Carotenoids in Natural Photosynthesis	329
V. Carotenoids in Biomimetic Systems	330

VII. The Evolution of Carotenoid Function in Photosynthesis	334
VIII. Carotenoids in Artificial Photosynthesis	335
IX. Conclusions	337
Acknowledgments	337
References	337
<b>19 Physical Properties of Carotenoids in the Solid State</b>	<b>341–361</b>
<i>Hideki Hashimoto</i>	
Summary	342
I. Introduction	342
II. Physical Properties of Carotenoids in Thin-Solid Films	342
III. X-Ray Crystallography of Carotenoids	349
IV. Optical Properties of all- <i>trans</i> - $\beta$ -Carotene in the Condensed Phase	352
V. Transient Optical Properties of all- <i>trans</i> - $\beta$ -Carotene Single Crystals	357
References	360
<b>20 Carotenoids in Membranes</b>	<b>363–379</b>
<i>Wieslaw I. Gruszecki</i>	
Summary	363
I. Are Carotenoids Present in Lipid Membranes?	364
II. Localization of Carotenoids in Lipid Membranes	364
III. Solubility of Carotenoids in Lipid Membranes	367
IV. Effects of Carotenoids on Properties of Lipid Membranes	369
V. Actions of Carotenoids in Natural Membranes	374
Acknowledgments	377
References	377
