

Be part of an exciting summer research experience!

Are you looking for a great summer research experience in neuroscience?

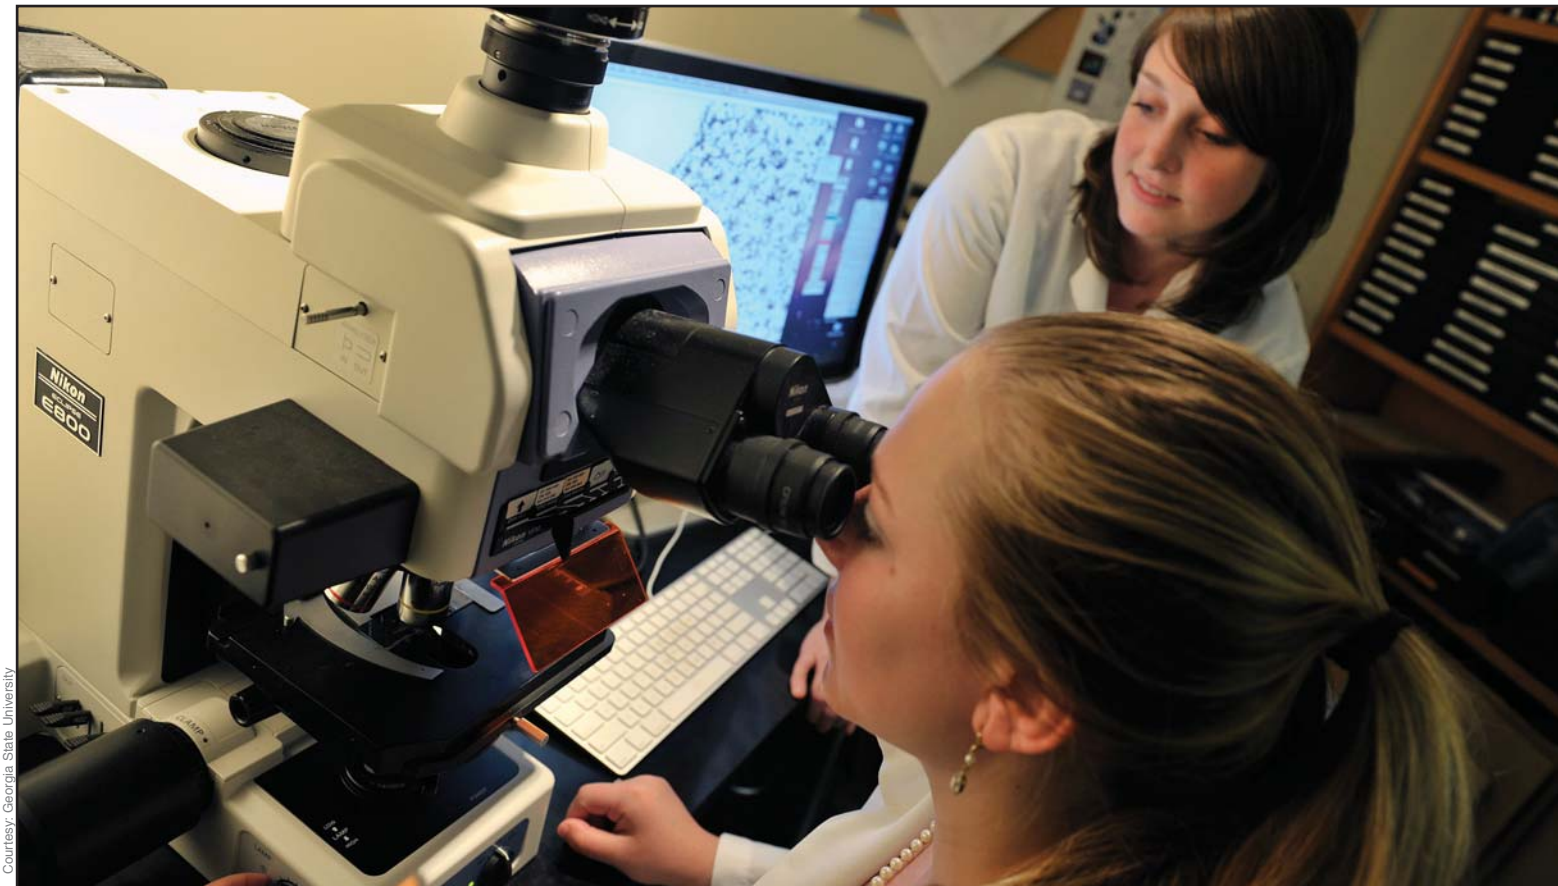

Are you an enthusiastic, hard-working, detail-oriented college student interested in a great summer research experience in neuroscience?

Apply for a BRAIN Fellowship today.

- ▶ BRAIN Fellows will participate in a 10-week summer research and education experience with full room and board plus stipend.
- ▶ Cutting-edge research will include investigations at the molecular or cellular level in laboratories, work with small animals, or research at outdoor field sites.
- ▶ Projects may include day and evening work.
- ▶ BRAIN is sponsored by the National Institute on General Medical Sciences (NIGMS) and the Center for Behavioral Neuroscience (CBN).

Supported by the National Science Foundation, BRAIN is designed to increase student interest in neuroscience research and other science-related careers such as science policy, science education, and science journalism.

For more information and application visit <http://www.cbn-atl.org/education/brain.shtml>, or contact Liz Weaver at eweaver1@gsu.edu.

BRAIN 2010

Behavioral Research Advancements In Neuroscience

is the program for you!
