

# YOU ARE INVITED TO TAKE THE HONDURAS WATER PROJECT ENG 398/598 | T/Th | 3:30-4:50PM

*The HWP has really challenged my views regarding international projects, and because of it I have new understanding of concepts like cultural sensitivity, approaching cases as independent matters, and being more open to new ideas.*

—Student, 2014-2015

Enroll in this two-semester course (Fa15 and Sp16) and you will help design a water distribution system and health education program for a rural Honduran community. By working closely with professional and alumni mentors, you will learn what makes international engineering projects successful and will have the opportunity to travel to Honduras during the 2016 semester.
