Demystifying the Graduate School Application Process

Memorial Sloan Kettering Cancer Center

Memorial Sloan Kettering Cancer Center (MSK) is hosting an online virtual event to provide **senior undergraduate and recent college graduates from historically underrepresented and underserved groups** with advice about the different aspects of applying for biomedical PhD programs.

This online event will be divided into 3 hour sessions over 3 days in mid-September (9/13-9/15). Participants will receive insights and advice on all aspects of biomedical graduate school from selecting the right programs, the application and interview process, fellowship advice, to guidance on how to make the right choice. All sessions will be led by MSK faculty and staff and selected participants will have a chance to receive feedback during a mock interview with an MSK faculty member.

Leaders of MSK PhD programs will present an overview of their respective programs including the Gerstner Sloan Kettering Graduate School of Biomedical Sciences, Tri-Institutional PhD Program in Chemical Biology, Tri-Institutional PhD Computational Biology and Medicine Program and the Weill Cornell Graduate School of Medical Sciences.

Who should apply?

This virtual workshop is geared toward applicants who are preparing to apply for a biomedical PhD program in the current cycle and have started to organize their application materials. Senior undergraduate students and postbac trainees from historically underrepresented and underserved groups including: individuals with disabilities, Black/African Americans, Hispanic/Latinx backgrounds, Native Americans, and natives of Hawaii or Pacific Islanders are strongly encouraged to apply.

The topics and dates for the virtual bootcamp sessions can be found on the application form at: tinyurl.com/DemystifyingGradSchool2022

Apply by
Thursday, September 1, 11:59 PM EST.
Applicants will be notified on a rolling basis (but not later than September 8) if they have secured a spot.
