Physical Activity and Neurocognitive Health Laboratory.

Learn how to:

- Centrifuge samples and analyze glucose levels
- Use accelerometry and inclinometers
- Collect EEG data
- Analyze Neuropsychological tests and computerized cognitive tasks
- Data collection, organization, and processing
- And much more !

What we do:

The PNC laboratory, directed by Dr. Dominika Pindus, examines daily physical activity, sedentary behaviors, cognitive and brain functions in children and adults. To learn more visit our website.
