

# ***2007 SUMMER INTERNSHIP***

## ***Biology***

### ***Life Science and Biology Majors***

Sigma-Aldrich Corporation, the world's largest supplier of biochemicals for research use, has **Summer Internships** available at our World Headquarters, located in St. Louis, Missouri. Sigma-Aldrich recruits from a diverse pool of top-ranked candidates who are currently enrolled in graduate and undergraduate programs in the US. The program pays a competitive salary and requires a commitment to work full-time at Sigma-Aldrich for 10-12 weeks. Our Summer Internship program is designed to help students develop and apply their skills and knowledge to prepare for a successful career in the sciences.

The program gives students the opportunity to work with high technology instrumentation and techniques in one or more of the following areas: Functional Genomics, Chromatography, Molecular Biology, Cell Biology, Biochemistry, and Protein Purification. Positions are available in our Analytical Services, Production, and R&D departments. In addition to gaining marketable experience in an industrial setting, students participating in the program have an opportunity to participate in structured projects under the guidance of a Sigma-Aldrich mentor, which is then presented to a Company-wide audience.

Participants conduct research, analysis, synthesis, testing, and experimentation on substances for such purposes as process development and application, quantitative and qualitative analysis, improvement of analytical methodologies and quality control. Ideal candidates will have experience in a laboratory setting.

Requirements include:

- Successful completion of general biology lecture and laboratory
- Excellent academic record
- Demonstrated core competencies, communication and leadership skills

**Any interested candidates are encouraged to apply online at the career page at**
