

Job Description

We are seeking a highly motivated Microbiologist to join our Manufacturing team. The candidate will be involved in strain maintenance, testing, culture preparation, and strain improvements for a variety of bacterial and fungal native and/or recombinant expression systems.

Education

BS or MS in Microbiology or equivalent.

Responsibilities

Develop a robust strain maintenance program

Use good aseptic technique

Maintain clear records of culture collection

Independently complete strain improvement activities to increase expression performance

Experience

Experience in microbiology lab required. Experience culturing atypical microbial cultures required. Experience with more advanced expression systems like *Pichia pastoris* and insect cells desirable.

Location

St Louis, MO
