

New Ph.D. Program in Integrated Bioscience at The University of Akron

New Ph.D. Program in Integrated Bioscience at The University of Akron

Our 21st century has aptly been called the era of integrated science, engineering and innovative technology. By combining biology, biochemistry, bioinformatics, materials science and bioengineering, integrated bioscience goes beyond rudimentary interdisciplinary work to address problems in health, the economy and the environment.

The University of Akron's rigorous and rewarding new Ph.D. Program in Integrated Bioscience offers highly expert faculty, state-of-the-art instrumentation and diversity of scientific studies. You will find that this full education in integrated bioscience is the means to understanding — and solving — complex, contemporary problems.
